ABOUT ME

Frontend Developer with 4+ years of experience building complex web applications for industrial and business environments. Bachelor's Degree in Technology and Multimedia Design, with a strong focus on software development. Experienced in React, Svelte and frontend architecture, with backend knowledge in Ruby on Rails. Contributed to software solutions delivered to 15+ companies, including clients such as Domestic & General, Metro Mondego, and IteCons, contributing to industrial software solutions, scalable frontend systems and API integrations. Experienced in improving production systems with a focus on performance, usability, and maintaining code.

EDUCATION

Escola Secundária de Santa Comba Dão
2012 - 2016 | Professional course
Managment technician and computer systems programming

Escola Superior de Tecnologia e Gestão de Viseu
2016 - 2018 | CTeSP
Web development and mobile devices

Escola Superior de Tecnologia e Gestão de Viseu
2020 | Summer school
IOT applications for Healthcare services

Escola Superior de Tecnologia e Gestão de Viseu
2018 - 2021 | Degree
Technologies and Multimedia Design

EXPERIENCE

2021 | 2022 — **Professional Internship**
ProjectBox, Lda.
Final reference: Very God
Frontend and backend application development
Support in building and maintaining internal tools
Collaboration in real-world projects within an agile environment
Learning and applying best practices in web development

2022 | 2026 — **Frontend / Full Stack Developer**
ProjectBox, Lda.
Developed and maintained scalable web applications using modern frontend technologies.
Improved UI performance and usability by redesigning interfaces and optimizing frontend components.
Collaborated with all teams to integrate APIs and ensure reliable data communication between systems.
Contributed in architecture decisions, debugging, maintenance and evolution of existing applications.
Built reusable UI components, improving maintainability.
Tech: React, SvelteKit, TypeScript, Angular, Ruby on Rails, REST APIs, Git, i18n, Tailwind.

KEY PROJECTS

2022 **GamingBox**

ProjectBox, Lda.

Built a sales competition platform used between stores to manage contests, rankings and performance tracking across multiple locations. This project is still being used at international level.
Developed as full stack using Rails and Angular frameworks.

2022 **VNT-TCA/Turboscope**

ProjectBox, Lda.

Built and maintained software for turbo and actuator diagnostics, handling raw ACM communication, updates server management, and add-on systems. Integrated industrial equipment including TCA, VNT, Turboscope, and Raspberry Pi-based solutions for actuator testing workflows in Ubuntu environments.
Developed using JavaScript in Linux operative system with hands-on CuteCom application for clear communication with the hardware.

2023 **Mind Your Visit**

ProjectBox, Lda.

Frontend backoffice development in Svelte to manage visits of responsible personnel to stores, tracking objectives and generating reports. It features a bidirectional geolocation and clusters using Google Maps API.
Frontend team-leader of 3 using Svelte V4.

2024 **SmartIn**

ProjectBox, Lda.

Implemented real-time employee access monitoring using WebSockets, improving visibility of entry/exit activity through reporting dashboards.
Frontend team-leader of 3 using Svelte V4.

2025 **Premiato**

ProjectBox, Lda.

Frontend and backend development in React.js and Rails for a cigar club with membership card, that was integrated with Apple Wallet and Google Wallet. This application features subscriptions, statutes, and a news section with brand updates. It also includes a backoffice for managing content and users/subscribers.
Team-leader and full-stack developer using React for frontend and Rails for the backend.

2026 **After**

ProjectBox, Lda.

Multi-profile platform for project, measurement, and installation management in the kitchen industry. The system includes 5 user roles (administrator, client, installer, team member, and external), each with distinct workflows and permission levels. It features operational dashboards with calendars, charts, and advanced filtering to manage requests and schedule measurements and installation appointments.
Team-leader of 3 and frontend developer using Svelte V5.
